-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The amendment filed on 1/7/04 has been received and entered in the case.

2. The drawings are objected to because Fig. 9 needs a "prior art" label. The argument that Fig. 9 does not need such a label is not persuasive. As applicant is well aware, if everything in a drawing figure is already known in the art (i.e., nothing about the invention is shown) then it must be labeled as prior art. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 12 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Nagai (newly cited).

Note Fig. 4, and also the last paragraph of column 1, as well as the limitations of Nagai's claim 5.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-11 and 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nagai.

The limitations of these claims do not define patentably over Nagai because they are all old and well-known features of piezoelectric resonator filters, of which fact official notice is taken. For example, as per claims 2 and 14, it is old and well-known in the art to make the thicknesses of the piezolayers different between the series and parallel FBARs (note the various references of record), as is the use of the various materials recited in claims 4-8.

5. In view of the above-noted new grounds of rejection not necessitated by applicant's claim amendments, this action is non-final.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth
